Reservoir Shoreline Protection: Coir Rolls, Rock Rolls & Spot Planting
(e.g. Longham Lakes)

Average retained water level
Reservoir bank

Diverse wetland 230cc root trainers at 08 plants per m²

Retained backwater

1.2m 100mm dia full chestnut stakes

Existing profile

300mm deep locally translocated soil with reed rhizomes in the soil

Pre-established coir roll

Shallow shoreline

300mm dia rock roll

Salix bioengineering
